Linking higher education and research to long term investments in capacity building: The experience of University of Dschang, Cameroon

Marie Louise AVANA TIENTCHEU, PhD
Department of Forestry, FASA, UD
Outline

• Brief Presentation of University of Dschang (UDs)
• Ecosystem Services related teaching and research conduct at University of Dschang
• Uds’ Strategic partnership for efficient capacity building at regional level (& fallouts of the “Journey” to date)
The University of Dschang (Uds) in few words

• Is the first regional Agricultural and natural resources oriented university created in 1993 from the former Schools of Agronomy starting from 1960’s (with ENCA);

• Is composed of 7 Faculties/institutes among which the Faculty of Agronomy and Agricultural Sciences (FAAS/FASA);

• Nearly 35,000 students are enrolled, of which about 10% are enrolled in postgraduate studies;

• Is part of a large and dynamic partnership at national (private & public sector), regional and international level.
Ecosystem Services (ES) Teaching and research work at UD

Many ES related courses are taught incl *inter alia*:

- Typology of ecosystems (Instructor: Pr Tsi);
- Biodiversity conservation (Instructor: Pr Tchamba);
- Economy of natural resources (Instructor: Dr Nkenfack);
- Ecosystem services from agroforestry systems (Instructor: Dr AVANA);
- Agrobiodiversity (Instructor: Dr AVANA); and
- Ecotourism (Instructor: Dr Tsague)
Ecosystem Services (ES) Teaching and research work at Uds (Cont’d)

Also take shape through specialised post graduate programmes such as:

- Professional MSc Program on Climate change and REDD, Audit and Certification of Forest products and Environnemental Impact Assessment (FASA-CRESA);

- Msc in Climate Change, Green Economy and Sustainable Development (Department of Geography);
Ecosystem Services (ES) Teaching and research work at Uds (End)

- Msc and PhD in Agroforestry and Optimisation of Ecosystems Services in Natural and Cultivated Ecosystems in the Congo Basin;

- Msc and PhD in Environmental Management / Integrated Natural Resources Management

- Msc in Agribusiness Management
Uds Strategic Partnership-1
(& fallouts of the “Journey” to date)

**RIFFEAC**: Capacity Building for Sustainable Management of the Congo Basin Forest … through

- Regional participatory curricula development in Forest Management and for vocational training, Bachelor and Master studies;
- Research subsidies to students and lecturers to generate knowledge;
- FASA-Uds positions as regional knowledge centre in Agroforestry training;
- Material support and infrastructure development
- Training of trainers (TOT) to reduce expertise gaps
Strategic Partnership-2

**ANAFE**: Building institutional capacity to enhance capacity for agricultural development in Africa agricultural Education ...through

- Reviewing and developing new curricula to respond to emerging agricultural job market;
- Training of lecturers in pedagogy and contextualising textbooks development;
- FASA-Uds as **pilot regional institution** to develop and test the new curricula in agricultural risk management including Climate Change;
Strategic Partnership-2 (Cont’d)

- 13 fellowships granted for Msc students to generate knowledge on agricultural risk management and agribusiness development;

- Support for recording and traceability of FASA alumni;

- Support for the Study of the State of knowledge on agricultural risk management
Strategic Partnership-3

Platform in Partnership for Research and Training (PCP) in Agroforestry ... through

- Joint resources mobilisation to improve the performance of Agroforestry systems in Cameroon (SAFSE, AS4FOOD, Trade of Cocoa to name a few); and

- Training of 17 students (Bachelors, Msc) and 7 PhD candidates so as to increase the pool of expertise in agroforestry.
Nutrient Flows in Perennial Crop-Based Farming Systems in the Humid Forests of Cameroon
