## The World Wide Fund for Nature (WWF) Cameroon Seeks a Biomonitoring Intern for Data Management

**Want to make a positive difference to the future of people and our one shared home, the Earth?**

**Working with WWF could be your opportunity of a lifetime:**

All around the world, people are waking up to the deepening crisis of nature loss. A growing realization that nature is our life-support system. And that nobody will be spared from the impacts of its loss. Here at WWF, we are helping to tackle this enormous global challenge.

Our people come from hugely diverse backgrounds and with a variety of expertise, ranging from HR and finance to advocacy and conservation science. We welcome applications from anyone who believes they can help us create a better future for people and wildlife.

### **What we do:**

We are an independent conservation organization, striving to sustain the natural world for the benefit of people and wildlife. From individuals and communities to business and government, we are part of a growing coalition calling on world leaders to set nature on the path to recovery by 2030. Together, we seek to protect and restore natural habitats, stop the mass extinction of wildlife, and make the way we produce and consume sustainable. WWF Network has moved to the development and the implementation of 9 Practices with Global Goals to be achieved.

For our Country Programme Office in Cameroon, we are looking for a dynamic and committed Biomonitoring Intern who will assist the Biomonitoring Program.

**Location: Yaounde, Cameroon**

**Duration: 6 Months**

### **Mission of the department**

For the Congo Basin countries to actively contribute to the Outcomes of some Practices (Wildlife, Forests, Food, Climate & Energy, Freshwater and Governance) implemented in their respective programmes, it is important to have a monitoring programme designed and implemented accordingly. Regarding new challenges and the need to continue and extend the monitoring programme to other developed goals and objectives in alignment with the Practices, the implementation of the Congo Basin Biomonitoring Programme has been adapted. The programme has been built as an "Integrated Biomonitoring Programme" which is meant to be integrated into day-to-day activities for more efficiency. The adaptation made is supporting field programmes and countries in delivering conservation outcomes and impacts for an easy contribution to the Global Goals.

As the main strategic axis of the Biomonitoring Program, the collection of reliable and structured data includes six distinct and complementary components to help better orient, optimize and evaluate conservation activities and results. The need for collected field data and produced results to be structured, stored and managed efficiently is essential for an easy use. To assist the Biomonitoring Program in filling this need, we are looking for a Biomonitoring Intern.

### **Major functions**

Under the supervision of the Congo Basin Biomonitoring Officer, and in close collaboration with the Regional Biomonitoring Coordinator and National Teams, the Biomonitoring Intern will focus on compiling and structuring existing data and the results produced from various analyses and data sources.

### **Main responsibilities**

- Conduct field missions to collect data and reports from field programs
- Compile the collected information in a structured way for internal and external databases
- Assist in data collection and data analysis according to the objectives of the program
- Provide support any other activity of Regional Biomonitoring Program when necessary

### **Profile:**

#### **Required Qualifications**

- Minimum MSc Degree in Biology, Natural Resources Management, Conservation, Database construction and management, Protected Area Management or related subjects
- Proven experience in camera trap media (photo and/or video) processing
- Familiarity with GIS analysis (particularly ArcGIS or QGIS)
- Proven statistics and data analysis capacities (Excel, other relevant software)

together possible.

- Ability to manage databases; experience with managing files on Cloud storages

#### **Required Skills and Competencies**

- Good skills both written and verbal (English and French)
- Good computer skills (MS Office package, Online researches, etc.), IT skills will be an asset
- Capable of working with minimal supervision
- Able to demonstrate WWF behaviours in ways of working: strive for impact, listen deeply, collaborate openly and innovate fearlessly
- Able to work effectively in various cultural environments
- Adhere to WWF's values: Respect, Courage, Integrity & Collaboration

#### **How to apply:**

Apply through the Link: [https://cameroon.panda.org/apply\\_to\\_a\\_job/apply\\_to\\_a\\_job/](https://cameroon.panda.org/apply_to_a_job/apply_to_a_job/) using a computer  
**(Please do not use a telephone)**

**Deadline for applications:** 10th April 2022.

Thank you in advance for your interest in this position. Please note that only candidates under serious consideration will be contacted for follow up. If you have not been contacted, consider your application unsuccessful.
